

SHRI DHARMASTHALA MANJUNATHESHWARA SCHOOL, MANGALURU
Grade: VIII **WORKSHEET - 3 SOLUTIONS**
CHAPTER 3 : UNDERSTANDING QUADRILATERALS

1) In the given figure

Exterior angle + Interior angle = **180°** (Linear pair).

$$x + 60^\circ = 180^\circ$$

$$\Rightarrow x = 180^\circ - 60^\circ$$

$$\Rightarrow \mathbf{x = 120^\circ}$$

$$y + 80^\circ = 180^\circ$$

$$\Rightarrow y = 180^\circ - 80^\circ$$

$$\Rightarrow \mathbf{y = 100^\circ}$$

$$z + 40^\circ = 180^\circ$$

$$\Rightarrow z = 180^\circ - 40^\circ$$

$$\Rightarrow \mathbf{z = 140^\circ}$$

2) In any parallelogram the lengths of opposite sides are equal.

$$AD = BC.$$

$$3x = 18$$

$$\Rightarrow x = 18/3$$

$$\Rightarrow \mathbf{x = 6}$$

$$AB = DC.$$

$$3y - 1 = 26$$

$$\Rightarrow 3y = 27$$

$$\Rightarrow \mathbf{y = 9}$$

3) At F the exterior is 70° so interior $\angle F = 180^\circ - 70^\circ = 110^\circ$

$\angle F = \angle H = \mathbf{x = 110^\circ}$ (Opposite angles are equal)

Consecutive interior angles in a parallelogram are supplementary, so

$$\angle E = 180^\circ - 110^\circ = 70^\circ$$

$\angle HEG = \mathbf{y = 40^\circ}$ (alternative angles are equal)

$$\angle z = 70^\circ - 40^\circ$$

$$\Rightarrow \mathbf{\angle Z = 30^\circ}$$

4) $\angle D = \angle B = 114^\circ$

$$\text{Then } 3y = 114^\circ$$

$$\Rightarrow y = 114^\circ / 3$$

$$\Rightarrow \mathbf{y = 38^\circ}$$

$$\angle A + \angle D = 180^\circ$$

$$42^\circ + \angle Z + 114^\circ = 180^\circ$$

$$\angle Z = 180^\circ - 156^\circ$$

$$\Rightarrow \mathbf{\angle Z = 24^\circ}$$

$\angle Z = \mathbf{x = 24^\circ}$ (alternative angles are equal)

5) Exterior angle + Interior angle = **180°** (Linear pair).

$$z + 100^\circ = 180^\circ$$

$$\Rightarrow z = 180^\circ - 100^\circ$$

$$\Rightarrow \mathbf{z = 80^\circ}$$

$z + y = 180^\circ$ (adjacent angles are supplementary)

$$80^\circ + y = 180^\circ$$

$$\Rightarrow y = 180^\circ - 80^\circ$$

$$\Rightarrow \mathbf{y = 100^\circ}$$

$y = \mathbf{x = 100^\circ}$ (opposite angles are equal)

6) Exterior angle + Interior angle = **180°** (Linear pair).

$$x + 120^\circ = 180^\circ$$

$$\Rightarrow x = 180^\circ - 120^\circ$$

$$\mathbf{x = 60^\circ}$$

$$y + 80^\circ = 180^\circ$$

$$\Rightarrow y = 180^\circ - 80^\circ$$

$$\mathbf{y = 100^\circ}$$

$$z + 60^\circ = 180^\circ$$

$$\Rightarrow z = 180^\circ - 60^\circ$$

$$\mathbf{z = 120^\circ}$$

$\angle CBA + \angle CDA = 180^\circ$ (opposite angles are supplementary)

$$80^\circ + \angle CDA = 180^\circ$$

$$\Rightarrow \angle CDA = 180^\circ - 80^\circ$$

$$\Rightarrow \angle CDA = 100^\circ$$

$W + 100^\circ = 180^\circ$ (Exterior angle + Interior angle = **180°** (Linear pair))

$$\Rightarrow W = 180^\circ - 100^\circ$$

$$\mathbf{W = 80^\circ}$$

7) Ratio of adjacent sides of a parallelogram = 5:4

Perimeter = 18 cm

Let the adjacent sides be $5x$ and $4x$.

$$\text{Perimeter} = 2(5x + 4x) = 2(9x) = 18x$$

But perimeter is given = 18 cm = 18

$$18x = 18$$

$$\Rightarrow \mathbf{x = 1}$$

So,

$$5x = 5 \times 1 = 5 \text{ cm}, 4x = 4 \times 1 = 4 \text{ cm}$$

The length of the adjacent sides = 5cm and 4cm

8) Exterior angle of a regular polygon = $360^\circ / \text{Number of sides}$

$$= 360^\circ / 10$$

$$= 36^\circ$$

Each exterior angle = 36°

9) Each interior angle = 160°
Interior angle + Exterior angle = 180°
Exterior angle = $180^\circ - 160^\circ = 20^\circ$

Exterior angle = $360^\circ / \text{number of sides}$
 $20^\circ = 360^\circ / \text{number of sides}$
 $\Rightarrow 20^\circ n = 360^\circ$
 $\Rightarrow n = 360^\circ / 20^\circ$
 $\Rightarrow n = 18$

The polygon has **18 sides**.

10) Interior angle + Exterior angle = 180°
Let the **exterior angle** be $2x$ and the **interior angle** be $7x$ (because the ratio is 2:7).
 $2x + 7x = 180^\circ$
 $\Rightarrow 9x = 180^\circ$
 $\Rightarrow x = 20^\circ$

So the **exterior angle** is:
 $2x = 2 \times 20^\circ = 40^\circ$

Exterior angle = $360^\circ / \text{number of sides}$
 $40^\circ = 360^\circ / n$
 $\Rightarrow 40^\circ n = 360^\circ$
 $\Rightarrow n = 360^\circ / 40^\circ$
 $\Rightarrow n = 9$

The polygon has **9 sides**.
